

SHARK FLAKE

DID YOU KNOW that when you eat flake, you're eating shark?

Sharks are apex predators. Many species are becoming extinct! This is detrimental to the oceans. Sharks keep the oceans healthy and in balance.

HEALTH WARNING

HEALTH WARNING

Sharks contain very dangerous levels of METHYL MERCURY & URIC ACID. SHOULD NOT be consumed!

Independent testing

of FLAKE from local outlets has shown FLAKE is not safe for human consumption. High levels of mercury and uric acid in FLAKE can hinder brain development, affect the central nervous system, cause mental retardation, lowering of IQ, diabetes, the formation of ammonium acid urate kidney stones and even death! Many Supermarkets are no longer stocking FLAKE due to these

DANGERS!
